BCSICT503 - Principles of Virtualization

L T P C

1 0 0 1

Course Objective:

This course gives students an insight into the basics of cloud computing along with virtualization, Cloud computing is one of the fastest growing domain from a while now. It will provide the students Basic understanding about cloud and virtualization along with it how one can migrate over it

MODULE-I

Introduction to Virtualization: Virtualization and cloud computing - Need of virtualization – cost, administration, fast deployment, reduce infrastructure cost – limitations Types of hardware virtualization: Full virtualization - partial virtualization - Para virtualization
Desktop virtualization: Software virtualization – Memory virtualization - Storage virtualization – Data virtualization – Network virtualization)

MODULE-II

Hypervisors and Virtual machines Server Virtualization: Understanding Server Virtualization, types of server virtualization, Virtual machine basics, types of virtual machines, hypervisor concepts and types Virtualization Solutions Understanding Microsoft's Virtualization solutions: Microsoft's Infrastructure Optimization Model, Virtualization and the Infrastructure Optimization Model, Benefits of Virtualization, Achieving the Benefits of Datacenter Virtualization, Achieving the Benefits of Client Virtualization, Achieving the Benefits of Cloud Virtualization

MODULE-III

Migrating into a Cloud Introduction, Challenges while migrating to Cloud, Broad approaches to migrating into the cloud why migrate -deciding on cloud migration, the Seven-step model of migration into a cloud, Migration Risks and Mitigation, Enterprise cloud computing paradigm, relevant Deployment Models for Enterprise Cloud Computing, Adoption and Consumption Strategies, issues for enterprise applications on the cloud

BCSICT504 – Humanities II Engineering & Managerial Economics

MODULE-I

Introduction: Meaning, Nature and Scope of Economics, Meaning of Science, Engineering and Technology. Managerial Economics and its scope in engineering perspective.

MODULE-II

Basic Concepts Demand Analysis, Law of Demand, Determinates of Demand, Elasticity of Demand-Price, Income and cross Elasticity. Uses of concept of elasticity of demand in managerial decision

MODULE-III

Demand forecasting Meaning, significance and methods of demand forecasting, production function, Laws of returns to scale & Law of Diminishing returns scale. An overview of Short and Long run cost curves – fixed cost, variable cost, average cost, marginal cost, Opportunity cost

MODULE-IV

Market Structure Perfect Competition, Imperfect competition – Monopolistic, Oligopoly, duopoly sorbent features of price determination and various market conditions.

MODULE-V

National Income, Inflation and Business Cycles Concept of N.I. and Measurement. Meaning of Inflation, Type causes & prevention methods, Phases of business cycle

Open Elective-I

BCSICT609 UI/UX Fundamentals

Course Description: The increasing possibilities with interactive technology as opened to virtual classrooms for teaching and educating the students. Research has proven that interactive teaching using such visual technologies is much more effective than the traditional methods which help students understand and gain knowledge better. Virtual reality is used in many training scenarios as it consists of a wide range of benefits for academia and industrial needs. Course Objectives: Students will get to know about various techniques of Graphic Design and UI/UX and will develop skills to become a professional designer. They will be taught to enhance their knowledge and master tools producing good industry standard designs. Students will be able to work on advertisements, website, and app designs.

Course Outcomes (COs): At the end of this course students will be able to:
CO 1. Create Graphic Design artworks of your own.
CO 2. Explain the functionality of different design related software
CO 3. Use learned skills to solve problems of various layouts
CO 4. Test own's skill and knowledge for a better workflow
CO 5. Select best output and what works for a particular given project
CO 6. Develop ideas and various app designs and website pages..

MODULE-I

Unit 1: Computer Fundamentals & Digital Illustration, Introduction to Graphic Design and Its Uses, Raster & Vector Graphics, Drawing Vector Shapes and Illustrations, Art & Sketching, Drawing Techniques, Conceptual Thinking in Creativity, Developing a Personal Illustration Style, Color Modes, Schemes, Design, Image Retouching and Color Balancing, Using Filters Corporate Identity Design Designing Brochures & Catalogues Layouts for Newspapers, Designing Magazines, Visual Design Principles

MODULE-II

UI design fundamentals, Evolution of user interfaces, Interaction with physical components, Flat design, Role of UI in UX,Laws of digital interface design, Understand user experience,VIMM model, Know your user, user research, Difference between design and art, emotional design, designing for mental models, Importance of presentation, content, interactions, screen elements, accessibility, and global standards

MODULE-III

Typography, Types of typefaces, Typography Terminology, Guidelines for proper type selection, Typography design, Analyzing Aesthetics as per laws of Design principles, Alignment, Spacing, Lighting & Shadows, Grids,Consistency

MODULE-IV

Design Language & Rapid Prototyping • In-depth study of Design languages for different Google material platforms • Style guides and its importance • Apple Human centered Design guidelines measurements of UI components • Design for platforms: Mobile, Web, Tablet, Responsive, Smart Watch • Mood boards • UX design principles and laws • Introduction to Adobe XD • Creating low and high-fidelity prototypes

INVERTIS UNIVERSITY BAREILLY

BCSICT610 Mobile ApplicationDevelopment

MODULE-I

Introduction to Android: The Android Platform, Android SDK, Eclipse Installation, Android Installation, Building you First Android application, Understanding Anatomy of Android Application, Android Manifest file..

MODULE-II

Android Application Design Essentials: Anatomy of an Android applications, Android terminologies, Application Context, Activities, Services, Intents, Receiving and Broadcasting Intents, Android Manifest File and its common settings, Using Intent Filter, Permissions.

MODULE-III

Android User Interface Design Essentials: User Interface Screen elements, Designing User Interfaces with Layouts, Drawing and Working with Animation.

MODULE-IV

Testing Android applications, Publishing Android application, Using Android preferences, Managing Application resources in a hierarchy, working with different types of resources. UNIT - V Using Common Android APIs: Using Android Data and Storage APIs, Managing data using Sqlite, Sharing Data between Applications with Content Providers, Using Android Networking APIs, Using Android Web APIs, Using Android Telephony APIs, Deploying Android Application to the World..

BCSICT616 PC Ethical Hacking Lab

Course Objectives:

Introduces the concepts of Ethical Hacking

Gives the students the opportunity to learn about different tools and techniques in Ethical hacking and security Practically apply Ethical hacking tools to perform various activities.

Course Outcomes:

After completion of course, students would be able to:

Understand the core concepts related to vulnerabilities and their causes

Understand ethics behind hacking and vulnerability disclosure

Appreciate the impact of hacking

Perform the lab Experiments based on the following facts.(Develop your own set of lab experiments)

1 Google Hacking

2 Scanning

Locating Open Ports

Network mapping

OS Fingerprinting

3 Gaining and Maintaining Access
4 Passwords hacking
5 Password Cracking Methods
6 Password Cracking Software
7 Man-in-the-Middle
8 Backdoors
9 Denial of Service
10 Covering tracks
11 Intrusion Detection Systems
12 Intrusion Prevention Systems
13 Anti-viruses
14 Malware
15 Viruses
