Laboratory Course: [BCS-352] IT Infrastructure Management Lab

Programme: Bachelor of Technology in Computer Science & Engineering **Manual Type: VIVA QUESTIONS**

Prescribed w.e.f Academic Session 2023-2024 **Lab Coordinator: Prof. Amit Saxena (Dept. of**

Linux Systems Administration & Virtualization Viva Voce Guide

==========

1. Core Linux Kernel & Commands Viva

- Q1: What is the difference between a Hard Link and a Soft (Symbolic) Link in Linux?

  A: Hard links share the same inode number; soft links are pointer files referencing the file path.

- Q2: Explain the significance of file permissions 754 in octal notation.

  A: Owner has rwx (7), Group has r-x (5), Others have r-- (4).

2. Virtualization & Networking Viva

- Q3: What is the difference between Bridged and NAT virtual networking in VMware?

  A: Bridged assigns VM its own IP on physical LAN; NAT shares host IP through internal routing.

- Q4: How does the ’diff’ and ’patch’ workflow work in system administration?

  A: diff generates difference delta; patch applies the delta cleanly to production configurations.
